PROFESSIONAL SUMMARY

B.Tech CSE (AI) graduate with hands-on experience across Java, Python, and Salesforce development, including object-oriented programming, Collections Framework, exception handling, and REST-based application logic. Built diverse projects spanning a Java-based Student Management System with chatbot integration, a Salesforce CRM for lead management using Apex and LWC, and a Python/OpenCV computer vision system for real-time driver drowsiness detection. Comfortable working across the full development lifecycle, from coding and debugging to deployment, with a strong focus on clean, maintainable, and scalable design. Seeking an entry-level Software Engineer role to apply this versatile technical foundation and continue growing across the stack.

EDUCATION

Bachelor of Technology - Computer Science (AI) | CGPA: 7.57/10 2022-2026
AKTU, Lucknow

Intermediate - Class XII 2022
CBSE

High School - Class X 2020
CBSE

TECHNICAL SKILLS

Programming Languages: Java, Apex, Javascript, Python, SQL

Java Concepts: Object-Oriented Programming, Collections Framework, Exception Handling, File Handling, Arrays & Strings

Salesforce Technologies: Apex, Lightning Web Components, SOQL, SOSL, Apex Triggers, Salesforce CLI, Developer Console, Workbench, Sales Cloud, Einstein GPT, Agentforce, Flow Builder

Web Technologies: HTML5, CSS3, Bootstrap4

AI/ML: NumPy, Pandas, Dlib, Matplotlib, OpenCV, Computer Vision, Real time data processing

AI Tools: ChatGPT, Claude, Github Copilot, Cursor

Developer Tools: VS Code, Eclipse IDE, IntelliJ IDEA

Version Control: Git, Github

PROJECTS

Student Management System with ChatBot | Java, OOP, Collections Framework May 2026 - June 2026

- Developed a Java-based system managing 500+ student records across a modular multi-class architecture.
- Applied OOP with Collections Framework, Exception Handling, and File Handling for error-resilient data management.
- Integrated a Java chatbot reducing average student query resolution time by 60%.
- Designed scalable architecture supporting seamless addition of new modules without breaking existing functionality.

Customer Lead Tracker | Salesforce CRM | Apex, LWC, SOQL, Salesforce CLI Feb 2026 - Apr 2026

- Built a Salesforce CRM covering 3 business modules using Apex triggers, LWC, SOQL, and Flow Builder.
- Implemented data validation and business logic ensuring accurate and consistent lead information management.
- Developed interactive LWC features reducing manual data entry by 40%.
- Deployed across sandbox and production orgs via Salesforce CLI with zero post-deployment defects.

Drowsiness Detection System | Python, OpenCV, NumPy, Pandas, Matplotlib Mar 2025 - Jan 2026

- Built a real-time driver drowsiness detection system using 64 facial landmarks to monitor eye closure and trigger safety alerts.
- Achieved 95%+ eye-closure detection accuracy using 64-point dlib facial landmark model under varied lighting conditions.
- Reduced alert response latency to under 200ms through optimized frame processing and threshold tuning.
- Optimized video processing performance while collaborating in a 5-member Agile team.

CERTIFICATIONS

- Oracle Java Foundations - Oracle
- Java Intermediate - Sololearn
- Salesforce Ranger Rank (109 Badges, 50,000 Points)
- Salesforce Agentblazer Champion Badge - Salesforce
- Complete Python Programming - Udemy
- Programming Fundamentals with Python - Infosys Springboard

AREAS OF INTEREST

- Software Engineering
- Salesforce / CRM Development
- Java Development
